

Roshan Ali

MERN Stack Developer

 Lahore  +92 325 7562688  roshanalee5110@gmail.com  LinkedIn  GitHub

Professional Summary

Dynamic MERN Stack Developer with hands-on experience in JavaScript, React.js, Node.js, Express.js, and MongoDB. Demonstrated expertise in building scalable web applications and seamlessly integrating REST APIs while managing databases effectively. Exceptional problem-solving skills combined with a passion for delivering optimized, user-friendly solutions that significantly enhance overall user experience. Committed to continuous learning and staying current with industry trends to drive innovation and efficiency in every project.

Technical Skills

Languages:	Proficient in advanced JavaScript Techniques
Frontend:	Proficient in implementing UI with React.js
Backend:	Proficient in Node.js, Express.js for backend solutions
Database:	MongoDB Management
Version Control:	Git & GitHub (Proficient in managing repositories)

Soft Skills

Problem Solving & Debugging — Team Collaboration — Adaptability — Communication

Experience

MERN Stack Developer — SeeBiz PVT LTD, Lahore

June 2025 – Present

Developed and maintained responsive full-stack web applications using React.js, Node.js, Express.js, and MongoDB. Focused on performance, scalability, and user experience while ensuring secure API integration and efficient database handling.

Key Contributions :

- Designed RESTful APIs with secure JWT authentication and middleware. Real-time
- features implemented using WebSockets for instant data updates. Collaborated with
- cross-functional teams to develop scalable MERN applications. Utilized Git for version
- control and efficient project collaboration.

Projects

Student Management System (MERN Stack) — Developed a student management system with JWT authentication, role-based dashboards, and CRUD functionality on the teachers' dashboard where all the students are added. Students can manage courses and perform CRUD functionality on their dashboards. Implemented private routing.

Social Media Application (MERN Stack) — Built a feature-rich app with email verification (OTP), JWT authentication, where users can create, read, update, and delete posts. Implemented like, com- ment, and reply features. Integrated WebSocket for live updates.

FormValidation&CRUDwithDOM(Javascript)— Create dynamicformvalidationproject where we can add students and perform CRUD functionality. We used localStorage for persistence, unique email checks, and responsive UI. Developed and maintained responsive web applications using MongoDB, Express.js, React.js, and Node.js, ensuring an optimal user experience. Implemented RESTful APIs to facilitate seamless data exchange between front-End and back-end systems, improving application performance. Used Git for effective collaboration and code management.

Education

BS in Information Technology — MNS University of Agriculture, Multan, Punjab, Pakistan 2021 - 2025
